

Exercise 1.01 - JSON File

Step 1 - Create the JSON file

- Using Visual Studio Code, create an empty file called "document.json"

Step 2 - Create the JSON structure

- Create the initial empty JSON structure/object
- Within that structure, add the following attributes:
 - version: numeric with a value of 4
 - terraform version: string, with a value of 1.0.0
 - an empty collection/list of resources
